

ECO Vision at Newport Primary School

At Newport, our vision is to nurture environmentally responsible, respectful and proactive pupils who take pride in caring for their school and the wider community. We strive to empower all children to understand their role in protecting the environment and to make informed, sustainable choices in their everyday lives.

Through a positive, inclusive and supportive environment, pupils develop the knowledge, skills and attitudes needed to value and protect the natural world. We set high expectations for all members of our school community to take responsibility for maintaining a clean, safe and sustainable environment, both within school and in the local area. We promote a strong sense of pride, ownership and stewardship, ensuring every child feels they can make a difference.

How ECO Education Promotes SMSC

- **Spiritual Development**

- Encourages appreciation and respect for the natural world.
- Promotes reflection on personal responsibility towards the environment.
- Develops a sense of awe, wonder and connection with nature.

- **Moral Development**

- Teaches responsibility for protecting the environment and making sustainable choices.
- Encourages understanding of right and wrong in relation to environmental impact.
- Promotes care, respect and accountability for shared spaces.

- **Social Development**

- Develops teamwork through collective responsibility for the school environment.
- Encourages pupils to contribute positively to their local community.
- Builds a shared commitment to maintaining high standards of behaviour and care.

- **Cultural Development**

- Promotes awareness of global environmental issues and different approaches to sustainability.
- Encourages respect for diverse perspectives on conservation and environmental care.
- Prepares pupils to be active, responsible global citizens.

- **In Practice at Newport**

- High expectations for maintaining a clean, safe and environmentally friendly school environment.
- Opportunities for pupils to take responsibility (e.g. eco-warriors, recycling initiatives, gardening projects).
- Integration of sustainability and environmental awareness across the curriculum.
- Encouragement of care and respect for the local environment and community spaces.
- A whole-school ethos of pride, responsibility and positive action towards protecting our world
