

Geography Vision

At Newport, our vision for Geography is to inspire all pupils to become inquisitive, informed and responsible global citizens who understand the world and their place within it.

Through engaging and relevant learning, pupils explore physical and human geography, developing knowledge about environments, cultures and global issues. We encourage pupils in our Middlesbrough community to understand both their local area and the wider world, fostering responsibility and respect for the planet.

How Geography Promotes SMSC

Spiritual Development

- Inspires awe and wonder about the natural world and environments.
- Encourages reflection on humanity's relationship with the Earth.
- Develops curiosity about different places and landscapes.

Moral Development

- Promotes understanding of environmental responsibility and sustainability.
- Encourages pupils to consider fairness in global issues such as inequality and climate change.
- Develops a sense of responsibility for protecting the planet.

Social Development

- Encourages collaboration and discussion around real-world issues.
- Helps pupils understand how communities and societies interact.
- Builds awareness of global connections and interdependence.

Cultural Development

- Explores diverse places, cultures and ways of life around the world.
- Promotes respect and appreciation for cultural diversity.
- Prepares pupils to live and contribute in a global society.

In Practice at Newport

- A curriculum linking local geography with global understanding.
- Opportunities to explore real-world issues and sustainability.
- Inclusive teaching that reflects diverse cultures and environments.
- A focus on developing responsible, informed global citizens.
